DESCRIPTORS: Thermonuclear reactions, *Tritium, *Deuterium, *Plasma physics, Radioactive isotopes, Nuclear energy, Interstellar matter, *Reactor theory.

We investigated the possibility of a stationary state for deuterium-tritium gas mixtures in the plasma state, kept at constant pressure in a spherical vessel. We chose a figure for the temperature at the center of the plasma sphere in the neighborhood of the temperature corresponding to maximum production of thermonuclear (Nuclear Physics--Nuclear Engineering, TT, v. 6, no. 6) (over)
